

Managing Your Website

A hands-on guide to your admin panel — adding machines to the catalog, answering client inquiries, and keeping your company details current. Every screen in this guide is a real screenshot of your own system.

NO CODING REQUIRED

COVERS ADMIN.PHP

~25 MIN READ

KEEP THIS DOCUMENT INTERNAL

Start here — your first ten minutes

If you only do five things today, do these.

- 1 Open your website address followed by `/admin.php` and sign in.
- 2 Go straight to **Settings → Admin Account** and change the default password.
- 3 Check **Settings → Company & Contact Info** — phone numbers and address show on every page of the public site.
- 4 Open **Inquiries** and see whether any client is waiting for a reply.
- 5 Add one product from start to finish using **section 04**, then open the public website to see it live.

01 How the site fits together

Your website has two halves. Customers only ever see the first one; you work in the second.

THE HALF	ADDRESS	WHO SEES IT	WHAT IT IS
The public website	<code>ethiotractors.com</code>	Everyone	Your homepage, industries, product catalog, brands and contact form.
The admin panel	<code>ethiotractors.com/admin.php</code>	Staff only, after signing in	Where you add machines, read inquiries and edit company details.

PUBLIC SITE The half your customers see. Everything in it is fed by the admin panel.

There is no separate "publish" or "go live" button anywhere in the panel. **The moment you save something in the admin panel, it is live on the public website.** Refresh the public page and the change is already there.

What you can change yourself

Everything in this list is yours to edit, any time, with no developer involved:

- Products — add, edit, photograph, reorder and delete them
- The order machines appear in on the catalog page
- Company name, phone numbers, email, address, branches and working hours
- The map location on the contact page
- Your Telegram, Facebook and LinkedIn links
- Trade licence number
- Your own username and password

What needs your developer

- Page layout, colours, fonts and the homepage hero images
- The wording of the About Us section and the industry descriptions
- Adding brand logos to the Brands strip
- New pages or new sections

GOOD TO KNOW

The admin panel is deliberately hidden from Google — it is marked "do not index", so it will never turn up in search results. It is protected by your username and password alone, which is why section 02 asks you to change that password before anything else.

02 Signing in

Type your website address in the browser, add `/admin.php` to the end, and press Enter. You will land on the staff portal.

ETHIO TRACTORS .com

STAFF PORTAL — AUTHORIZED ACCESS ONLY

USERNAME

1 admin

PASSWORD

2

3 **Sign In →**

First time here? The default account is **admin** / **ethio2026** — change it under **Settings → Account** right after signing in.

[← Back to the public website](#)

SCREEN The staff sign-in page at `/admin.php`.

- 1 Type your **username**. On a brand-new site this is `admin`.
- 2 Type your **password**. On a brand-new site this is `ethio2026`.

3 Press **Sign In**. You arrive at the Dashboard.

DO THIS FIRST

While the site is still using the default password, the login page prints those default details on screen for anyone who visits it. That hint **disappears automatically the moment you set your own password** — which is exactly why changing it is the first job. Jump to [section 08](#) and change it now, then come back.

Three things the login page does to protect you

BEHAVIOUR	WHAT YOU WILL SEE	WHAT TO DO
Automatic sign-out after 1 hour with no activity	"You were signed out after an hour of inactivity."	Simply sign in again. Nothing you saved is lost.
Wrong-password lockout after 6 failed tries in 10 minutes	"Too many failed attempts — please wait a few minutes and try again."	Wait roughly ten minutes, then try once more, carefully.
Expired session on a form left open too long	"Session expired — please try again."	Sign in again and re-enter the form. This protects you from forged requests.

TIP

Bookmark `/admin.php` in your browser so you never have to type it. Sign out using the **Sign Out** button at the bottom of the left menu whenever you finish on a shared or public computer.

03 Finding your way around

The Dashboard is the first screen after signing in. It answers one question: is anything waiting for me today?

SCREEN Dashboard — Admin / Overview .

- 1 The menu.** Always down the left. It never changes, whatever screen you are on.
- 2 Four figures.** A summary of your catalog and your inbox, explained just below.
- 3 Latest Client Inquiries.** The six most recent messages. View All → opens the full inbox.
- 4 Shortcuts.** + Add Product and Open Inbox — the two jobs you will do most.

What the four figures mean

FIGURE	COUNTS
Catalog	Every product currently published on the public website.
New Inquiries	Messages nobody has handled yet. This is the number to keep at zero.
All Inquiries	Every message ever received, in any status.
Newsletter	People who submitted only their email to be kept informed.

The menu, item by item

DETAIL The left menu. The red badge on Inquiries is your unread count.

MENU ITEM	WHAT IT IS FOR
Overview	The Dashboard you just read about.
Products	Your machine catalog — add, edit, reorder, delete.
Inquiries	Your inbox. The red badge counts messages still marked NEW .
Site Reports	How many people visited and which machines they asked about.
Proforma SOON	Not built yet. Quotes and invoices are planned here.
Stock & Inventory SOON	Not built yet. Stock levels are planned here.
Sales SOON	Not built yet. Completed sales are planned here.
Settings	Company details, your account, and the danger zone.
View Website ↗	Opens the public site in a new tab so you can check your work.

GOOD TO KNOW

The three items marked **SOON** are visible on purpose, so you know what is coming. Opening one shows a short description and nothing else — you cannot break anything by clicking on them.

04 Adding a product

This is the job you will do most often, so it is worth doing once slowly. We will add a real machine — a Doğanlar heavy disc harrow — from the empty form to a live card on the public website.

1

Open the form

Click **Products** in the left menu, then the red **+ Add Product** button at the top right. An empty form opens with two cards: **Product Details** on the left, **Card Artwork** on the right.

The screenshot shows the 'Add Product' form in the EthioTractors admin panel. The left sidebar contains the 'Products' menu item. The main form is titled 'Add Product' and is divided into two columns. The left column, 'Product Details', contains fields for 'PRODUCT NAME *' (with a placeholder 'e.g. Disc Harrow'), 'SECTOR *' (a dropdown menu with 'Agriculture' selected), 'CATEGORY' (a dropdown menu with 'e.g. Ploughs' selected), 'BRAND' (a dropdown menu with 'e.g. Zoomlion' selected), 'DESCRIPTION' (a text area with a placeholder 'One or two sentences shown on the product card'), 'TAGS' (a text area with a placeholder 'e.g. Earthmoving, Heavy Duty'), and 'SPECIFICATIONS' (a text area with a placeholder '+ Add Specification'). The right column, 'Card Artwork', contains a 'PRODUCT PHOTO' section with a 'Choose File' button and a 'No file chosen' message, and a 'FALLBACK LINE-ART ICON' section with a dropdown menu showing 'Machine'. At the bottom right is a red 'Add To Catalog' button.

SCREEN The blank form — Admin / Catalog / New .

Product Details

PRODUCT NAME *

1 e.g. Disc Harrow

SECTOR * 2 Agriculture ▼

CATEGORY 3 e.g. Ploughs

BRAND 4 e.g. Zoomlion

DESCRIPTION

5 One or two sentences shown on the product card

TAGS (comma separated, first two are shown)

6 e.g. Earthmoving, Heavy Duty

SPECIFICATIONS (shown as a mini spec sheet)

7 + Add Specification

SCREEN Product Details. Only the first two fields are compulsory.

- 1 **Product Name** — required. What the customer reads first, e.g. *Doganlar Heavy Disc Harrow HDH-32*.
- 2 **Sector** — required. Decides which tab of the public catalog the machine appears under.
- 3 **Category** — the small grey line under the name, e.g. *Harrows & Tillage*.
- 4 **Brand** — e.g. *Doganlar, Zoomlion, Romsan*. Printed above the product name on the card.
- 5 **Description** — one or two sentences. This is the paragraph on the product card.
- 6 **Tags** — separate with commas. **Only the first two are shown** on the card.
- 7 **+ Add specification** — builds the mini spec sheet. Covered in the next step.

Field limits at a glance

FIELD	REQUIRED	MAXIMUM LENGTH	WHERE IT SHOWS
Product Name	Yes	160 characters	Card heading
Sector	Yes	Pick one of four	Catalog tab
Category	No	80 characters	Small line above the name
Brand	No	80 characters	Small line above the name
Description	No	600 characters	Paragraph on the card
Tags	No	200 characters	Grey chips, first two only

WATCH OUT

If you leave the name empty or forget the sector, the panel refuses to save and tells you *"A product needs at least a name and a sector."* Everything else is optional.

The four sectors are fixed: **Agriculture, Construction, Mining** and **Power & Logistics**. Choose the one a customer would look under, not the one the factory uses.

3

Add the specifications

Specifications become the small grey table on the product card — the numbers a buyer scans before they call you. Click **+ Add specification** once per line.

SPECIFICATIONS (shown as a mini spec sheet)

Working width	3.2 m	×
Number of discs	32 (Ø 660 mm)	×
Power req.	90 - 130 hp	×
Weight	1,850 kg	×
+ Add Specification		

SCREEN Four specification rows, filled in.

- 1 Label** — the left column, e.g. *Working width*. Up to 60 characters.
- 2 Value** — the right column, e.g. *3.2 m*. Up to 100 characters.
- 3** × removes that row. There is no confirmation, but nothing is saved until you press the save button.
- 4** + **Add specification** adds another empty row underneath.

GOOD TO KNOW

A row is only saved when **both** the label and the value are filled in. Half-empty rows are quietly dropped, so you can leave a spare blank row on screen without it appearing on the website.

TIP

Four to six specifications reads best. Pick the ones buyers actually compare — working width, power requirement, capacity, weight — and keep the same labels across similar machines so customers can compare them at a glance.

4

Add the photo

Move to the **Card Artwork** card on the right.

Card Artwork

PRODUCT PHOTO

Choose File

doganlar-d...-harrow.jpg

Upload a JPG, PNG, WebP or GIF up to 5 MB. The photo replaces the icon on the product card.

...OR PASTE AN IMAGE LINK (OPTIONAL)

https://.../machine.jpg

FALLBACK LINE-ART ICON

Machine

Shown on the product card whenever no photo is set.

Add To Catalog →

SCREEN Card Artwork, with a photo chosen and previewing.

- 1 Preview.** Your photo appears here immediately — before saving. If it looks wrong here, it will look wrong on the site.
- 2 Choose File.** Picks a photo from your computer or phone.
- 3 Image link.** An alternative — paste a web address of a photo instead of uploading one.
- 4 Fallback icon.** A simple line drawing used *only* when there is no photo at all. Pick the closest machine type.

- 5 Add To Catalog.** Saves everything on both cards. Nothing is stored until you press this.

Photo rules

RULE	DETAIL
Accepted formats	<code>.jpg</code> <code>.png</code> <code>.webp</code> <code>.gif</code>
Maximum size	5 MB per photo
If you do both	An uploaded file always wins over a pasted link.
If you do neither	The fallback line-art icon is shown instead.

WATCH OUT

If the file is too big, or is not really an image, the panel refuses it with *"Photo not saved — please use a JPG, PNG, WebP or GIF image under 5 MB."* Renaming a file to `.jpg` does not make it one — the panel checks the actual contents.

TIP — PHOTOS THAT SELL

- Shoot the whole machine, side-on, with nothing cut off at the edges.
- A plain background — a clear yard or a wall — beats a busy workshop.
- Keep all your photos roughly the same shape, so the catalog rows line up neatly.
- Photos straight from a phone are often 8–12 MB. If yours is refused, reduce it before uploading.

5

Check the whole form before saving

This is the completed form, both cards filled in. Read it once from top to bottom — it is far easier to fix a typo now than after a customer has seen it.

EthioTractors — Managing Your Website

Page 16 of 37

New products are added to the **end** of the catalog. To move the machine further up, see [section 05](#).

See it on the public website

Click [View Website](#) ↗ at the bottom of the left menu, go to the Products section and find your machine. Everything you typed is now working for you:

PUBLIC SITE The same product as customers see it — third card from the left.

Read the card against what you typed: the brand and category sit above the name, the description is the paragraph, the four specifications became the grey table, the first two tags became chips, and [Get A Quote](#) → sends the customer to your contact form with this machine already filled in as their interest.

THAT IS THE WHOLE LOOP

Fill in a form, press save, and the machine is selling for you. Every product on your site was added exactly this way.

05 Editing, ordering and deleting

The product list is the control desk for your whole catalog.

The screenshot shows the 'Products' management interface. At the top left, the breadcrumb 'ADMIN / CATALOG' is visible. The main heading is 'Products'. On the top right, there is a '+ Add Product' button (callout 5). Below the heading, there is a row of sector tabs: 'All', 'Agriculture', 'Construction', 'Mining', and 'Power & Logistics' (callout 1). To the right of these tabs is a search box labeled 'Filter by name...' (callout 2). Below the tabs and search box is a drag-and-drop hint: 'Drag the ≡ handle to set the order products appear in on the website. Keyboard: focus a handle and press ↑ or ↓.' (callout 3). The main content is a table with columns: 'PRODUCT', 'SECTOR', 'BRAND', 'TAGS', and 'ACTIONS'. The table lists five products: 'Combine Harvester', 'Sugarcane Harvester', 'Baler', 'Grain Dryer', and 'Gas-Safe Reversible Plough'. Each product row has a drag handle (≡) on the left and 'Edit' and 'Delete' buttons on the right (callout 4). The 'SECTOR' column for all products is 'AGRICULTURE'. The 'BRAND' column shows 'Zoomlion' for the first four and 'Doğanlar' for the last. The 'TAGS' column shows 'Harvest' for the first two, 'Post-Harvest' for the next two, and '140x120 Profile' for the last.

PRODUCT	SECTOR	BRAND	TAGS	ACTIONS
Combine Harvester Harvesters	AGRICULTURE	Zoomlion	Harvest	
Sugarcane Harvester Harvesters	AGRICULTURE	Zoomlion	Harvest	
Baler Post-Harvest	AGRICULTURE	Zoomlion	Post-Harvest	
Grain Dryer Post-Harvest	AGRICULTURE	Zoomlion	Post-Harvest	
Gas-Safe Reversible Plough Ploughs	AGRICULTURE	Doğanlar	140x120 Profile	

SCREEN Products — Admin / Catalog

- 1 Sector tabs.** Narrow the list to one sector, or All.
- 2 Filter by name.** Type to find a machine instantly.
- 3 Drag hint.** Reminds you the ≡ handle sets the order on the website.
- 4 Edit and Delete** for that row.
- 5 + Add Product** — the form from section 04.

Finding one machine in a long catalog

Two tools, and they work together. Typing in the filter box hides every row that does not match — the name, the category and the brand are all searched:

The screenshot shows a web interface for a catalog. At the top, there are tabs for 'All', 'Agriculture', 'Construction', 'Mining', and 'Power & Logistics'. A search filter box on the right contains the text 'harrow' and has a red circle with the number '1' next to it. Below the tabs, there is a table with columns: PRODUCT, SECTOR, BRAND, TAGS, and ACTIONS. The table lists four products: 'Spring Chisel', 'Pin Cutting Chisel — Field / Garden', 'Disc Harrow', and 'Power Harrow'. Each product row has an 'Edit' button and a 'Delete' button. A red circle with the number '1' is also next to the 'Delete' button for the 'Power Harrow' product.

PRODUCT	SECTOR	BRAND	TAGS	ACTIONS
 Spring Chisel Chisels & Harrows	AGRICULTURE	Doğanlar	Deep Tillage	<button>Edit</button> <button>Delete</button>
 Pin Cutting Chisel — Field / Garden Chisels & Harrows	AGRICULTURE	Doğanlar	Deep Tillage	<button>Edit</button> <button>Delete</button>
 Disc Harrow Chisels & Harrows	AGRICULTURE	Doğanlar	Seedbed	<button>Edit</button> <button>Delete</button>
 Power Harrow Chisels & Harrows	AGRICULTURE	Doğanlar	Seedbed	<button>Edit</button> <button>Delete</button>

SCREEN Filtering the catalog by the word *harrow*.

Clicking a sector tab does the same thing by sector:

The screenshot shows the same web interface, but now the 'Construction' tab is selected, indicated by a red circle with the number '1' next to it. The search filter box is empty. The table now lists four construction-related products: 'Excavators — Mini to Large', 'Wheel & Crawler Loaders', 'Crawler Bulldozer', and 'Truck & Crawler Cranes'. Each product row has an 'Edit' button and a 'Delete' button.

PRODUCT	SECTOR	BRAND	TAGS	ACTIONS
 Excavators — Mini to Large Earthmoving	CONSTRUCTION	Zoomlion	Earthmoving	<button>Edit</button> <button>Delete</button>
 Wheel & Crawler Loaders Earthmoving	CONSTRUCTION	Zoomlion	Earthmoving	<button>Edit</button> <button>Delete</button>
 Crawler Bulldozer Earthmoving	CONSTRUCTION	Zoomlion	Earthmoving	<button>Edit</button> <button>Delete</button>
 Truck & Crawler Cranes Cranes & Hoisting	CONSTRUCTION	Zoomlion	Mobile Crane	<button>Edit</button> <button>Delete</button>

SCREEN The Construction tab selected.

Editing a product

Press **Edit** on any row. The same form from section 04 opens, already filled in. Change what you need and press Save Changes →.

No file chosen

1

REMOVE THE CURRENT PHOTO

...OR PASTE AN IMAGE LINK (OPTIONAL)

FALLBACK LINE-ART ICON

Machine

▼

Shown on the product card whenever no photo is set.

2

Save Changes →

Upload a JPG, PNG, WebP or GIF up to 5 MB. The photo replaces the icon on the product card.

SCREEN Editing an existing product.

- 1 Remove the current photo** — tick this to go back to the line-art icon. It only takes effect when you save.
- 2 Save Changes →** — updates the public website immediately.

GOOD TO KNOW

To swap a photo, just choose a new file — you do not need to remove the old one first. The panel replaces it and tidies the old file off the server for you.

Changing the order machines appear in

The order of the rows in this list is exactly the order customers see on the public catalog. Put your best sellers at the top.

Drag the ≡ handle to set the order products appear in on the website. Keyboard: focus a handle and press ↑ or ↓.

PRODUCT	SECTOR	BRAND	TAGS	ACTIONS
≡  Combine Harvester Harvesters	AGRICULTURE	Zoomlion	Harvest	Edit Delete
≡  Sugarcane Harvester Harvesters	AGRICULTURE	Zoomlion	Harvest	Edit Delete
≡ 2  Baler Post-Harvest	AGRICULTURE	Zoomlion	Post-Harvest	Edit Delete
≡  Grain Dryer Post-Harvest	AGRICULTURE	Zoomlion	Post-Harvest	Edit Delete
≡  Gas-Safe Reversible Plough Ploughs	AGRICULTURE	Doğanlar	140×120 Profile	Edit Delete

SCREEN The ≡ handle at the start of every row.

1 The **hint bar** explains both ways to reorder, and reports back when the new order has been saved.

2 The **≡ handle**. Hold it and drag the row up or down. On a tablet, press and drag with your finger.

Prefer the keyboard? Click a ≡ handle once to select it, then press ↑ or ↓ to walk the row up and down the list.

There is no save button — the new order saves itself a moment after you let go, and the hint bar confirms with *"Order saved"*.

WATCH OUT

You cannot reorder while the filter box has text in it — rows are hidden rather than removed, so a drop between two of them would be a guess. The bar will say *"Clear the filter to reorder products."* Empty the filter box and the handles work again.

GOOD TO KNOW

Reordering inside a single sector tab only shuffles that sector. The rest of the catalog stays exactly where it was.

Deleting a product

Press **Delete** on the row. You are always asked to confirm first:

DIALOG The confirmation step before anything is removed.

DELETING CANNOT BE UNDONE

There is no rubbish bin and no undo. The product and its photo are gone, and it disappears from the public catalog at once. **If a machine is only out of stock, edit the description instead of deleting it** — you keep the photo, the specifications and its position in the list.

06 Client inquiries

Every contact form on the public website lands here. This is your sales inbox — the number in the red badge is money waiting for a phone call.

ADMIN / INBOX

Client Inquiries

5 **Export CSV**

1 **All (11)** New (4) Contacted (4) Closed (3)

Click a row to read the full message and respond.

SCREEN Client Inquiries — Admin / Inbox .

- 1 **Status tabs** with a live count of each.
- 2 **Click any row** to open the full message underneath it.
- 3 **Source** — where it came from: **CONTACT** is the full contact form, **NEWSLETTER** is an email-only signup.
- 4 **Status** — how far along you are.
- 5 **Export CSV** — downloads every inquiry as a spreadsheet.

Reading and answering one

Click the row. It expands in place, showing the message and all the contact details:

The screenshot shows a web form for client inquiries. It includes a message field, a details section with fields for email, phone, company, industry, and product of interest, and a bottom section with action buttons. Numbered callouts highlight specific features: 1 points to the message text, 2 points to the email field, 3 points to the 'Reply By Email' button, 4 points to the 'Mark Contacted' button, and 5 points to the 'Delete' button.

MESSAGE

1 We farm 400 hectares near Awash and need three heavy disc harrows before the next planting season. Please send a proforma including delivery to Adama and your after-sales service terms.

EMAIL

2 a.tadesse@example.com

PHONE

0911234567

COMPANY / FARM

Awash Agro Farm PLC

INDUSTRY

Agriculture

PRODUCT OF INTEREST

Doganlar Disc Harrow

3 Reply By Email

4 Call Client

Mark Contacted

Mark Closed

5 Delete

SCREEN An expanded inquiry from a client asking for a proforma.

- 1 **The message** exactly as the client typed it.
 - 2 **Their details** — email, phone, company, industry and the machine they asked about.
 - 3 **Reply By Email** opens your email program with the address and subject line already written.
 - 4 **Mark Contacted** once you have replied or called. **Mark Closed** when the job is finished.
 - 5 **Delete** removes the inquiry permanently.
- On a phone, **Call Client** dials the number directly.

The three statuses

STATUS	MEANS	SET IT WHEN
NEW	Nobody has dealt with this yet. Counted in the red badge.	Set automatically when the client submits the form.
CONTACTED	You have replied or called. The conversation is live.	Straight after you reply — it clears the badge for your colleagues.
CLOSED	Finished, whether it became a sale or not.	When there is nothing further to do.

A SIMPLE DAILY ROUTINE

1. Open **Inquiries** and click the **New** tab.
2. Work down the list, oldest first — the newest are at the top, so start at the bottom.
3. Reply or call, then immediately press **Mark Contacted**.
4. Aim to leave the tab empty. An empty **New** tab means nobody is waiting.

Exporting to a spreadsheet

↓ **Export CSV** downloads every inquiry — all statuses, all sources — as a file named like `ethiotractors-inquiries-2026-08-04.csv`. It opens directly in Excel with the Amharic and accented characters intact. Useful for a monthly sales review or for importing into another system.

GOOD TO KNOW ABOUT TIMES

On screen, every date and time is shown in **Addis Ababa time**. Inside the exported spreadsheet the column is labelled *Date (UTC)* and runs three hours behind — that is normal and is there so the file is unambiguous wherever it is opened.

Newsletter signups

Rows marked **NEWSLETTER** are people who only left an email address on the public site. They have no message, no phone number and no company, so the expanded view is mostly empty — that is expected. Keep them; they are your mailing list.

07 Site reports

Site Reports answers a commercial question: which machines are people actually interested in?

SCREEN Site Engagement — Admin / Reports

- 1 The headline figures** for the last 30 days.
- 2 Daily activity** for the last 14 days — visits, quote clicks and inquiries side by side.
- 3 Most Quoted Products** — which machines customers pressed **Get A Quote** on.

4 Inquiry Pipeline — your whole inbox at a glance, by status and by source.

What each figure means

FIGURE	MEANING	HOW TO READ IT
Page Views	Pages opened in the last 30 days.	One person browsing four pages counts four times.
Unique Visitors	Separate people, last 30 days.	The honest measure of reach.
Quote Clicks	Taps on <u>Get A Quote.</u>	Real buying intent, machine by machine.
Conversion	Inquiries ÷ visitors, as a percentage.	How well the site turns interest into contact.

PUT IT TO WORK

Most Quoted Products is the most useful table on this page. A machine near the top with few actual inquiries usually means the card is not answering a buyer's question — try a better photo, clearer specifications, or a description that names the work the machine does. Machines that quote well deserve to be dragged to the top of the catalog.

PRIVACY

Visitor counting is anonymous. No names, no IP addresses and no personal details are stored — only an unnamed browser key used to avoid counting the same person twice. Figures start from the day the feature went live, so an empty chart on a new site simply means no visits have been recorded yet.

08 Company settings

Settings holds three separate boxes: your company details, your login, and a danger zone. Each has its own save button — pressing one does not save the others.

Company & contact information

These fields feed the top bar, the contact section, the footer and the map on every page of the public site. Change a phone number here and it changes everywhere at once.

Company & Contact Info

Shown on the public website — top bar, contact section, footer and map.

COMPANY NAME	TRADE LICENSE NO.	
1 EthioTractors	ET/AA/0123456/2016	
PHONE	PHONE 2	PHONE 3
2 0960995555	0961995555	0986807851
EMAIL		
info@ethiotractors.com		
HEAD OFFICE ADDRESS		
3 Bole Road, Addis Ababa, Ethiopia		
BRANCHES	WORKING HOURS	
Adama · Bahir Dar · Dire Dawa	Mon – Sat · 8:00 AM – 6:00 PM	
MAP LOCATION		
4 Bole, Addis Ababa, Ethiopia		
Address or place name used for the Google Map on the contact page.		
TELEGRAM URL	FACEBOOK URL	LINKEDIN URL
5 https://t.me/ethiotractors	https://facebook.com/eth	https://linkedin.com/com
Save Settings →		

SCREEN Company & Contact Info — Admin / Configuration .

- 1 **Company Name** — used across the site and in the subject line of email replies.
- 2 **Phone** — the main number. Two more optional numbers sit beside it.
- 3 **Head Office Address** — printed in the contact section and the footer.
- 4 **Map Location** — a place name or address that positions the Google map. See the warning below.
- 5 **Telegram, Facebook, LinkedIn** — paste the full web address, starting with `https://`. Leave blank to hide the icon.

WATCH OUT — THE MAP IS A SEPARATE FIELD

Map Location is not the same as **Head Office Address**. Changing your address does *not* move the map. Update both, and use a form Google Maps recognises for the map field — for example `Bole, Addis Ababa, Ethiopia`. After saving, open the public contact page and check the pin landed in the right place.

Press **Save Settings** → and the confirmation reads *"Site settings saved — the public website is updated."* Every field accepts up to 400 characters.

Your admin account

This is where you change the default password — the job from section 02.

Admin Account

USERNAME

1 admin

NEW PASSWORD

2 Leave empty to keep current

Minimum 8 characters.

CURRENT PASSWORD *

3 Required to confirm any change

Update Account →

SCREEN Admin Account.

- 1 **Username** — change it if you want something other than `admin`.
 - 2 **New Password** — at least 8 characters. Leave it empty to keep your current one.
 - 3 **Current Password** — always required, even when you are only changing the username.
- Press **Update Account →**. If the current password is wrong, nothing at all is changed and you are told so.

CHOOSING A GOOD PASSWORD

- Eight characters is the minimum the panel accepts — twelve or more is genuinely safer.
- Three unrelated words with a number are easy to remember and hard to guess.
- Do not reuse the password from your email account.
- Everyone shares this one login, so tell the rest of the team when you change it — and change it again whenever someone leaves.

The danger zone

SCREEN Danger Zone. Both buttons ask you to confirm first.

BUTTON	WHAT IT REALLY DOES	WHEN TO USE IT
Restore Default Catalog	Wipes every product — including all of yours, with their photos — and puts back the original import list.	Almost never. Only to start the catalog again from nothing.
Delete Closed Inquiries	Permanently removes every inquiry marked CLOSED . New and contacted ones are untouched.	Occasional tidying. Export the CSV first if you want the history.

NEITHER CAN BE UNDONE

Restore Default Catalog destroys weeks of cataloguing in one click. Both buttons ask you to confirm, and that confirmation is the only thing standing between you and the loss — read it before pressing Yes, do it.

09 On a phone or tablet

The whole admin panel works on a phone. Handy for answering a client from the yard, or photographing a machine and adding it where it stands.

CLIENT	INTEREST	CONTACT
Abebe Tadesse Awash Agro Farm PLC	Doganlar Disc Harrow Agriculture	a.tadesse@example.com
Meron Haile Highland Coffee Estate	Doganlar Rotovator Agriculture	meron.h@example.com
Dawit Bekele Rift Valley	Zoomlion Articulated Boom	d.bekele@example.com

PHONE The Dashboard stacks into one column.

PHONE The ☰ button slides the menu in.

The left menu is hidden to save room. Tap the ☰ button in the corner to slide it in, and tap anywhere outside it to slide it away.

ADDING A MACHINE FROM YOUR PHONE

Photograph the machine, open **Products → + Add Product**, and at **Choose File** your phone offers its camera and photo library. Do check the size — phone photos are often over the 5 MB limit and will be refused.

10 If something goes wrong

WHAT YOU SEE	WHY	WHAT TO DO
"Invalid username or password."	A typo, or the password has been changed by a colleague.	Check caps lock. After six failed tries you are locked out for a few minutes.
"Too many failed attempts."	Six wrong passwords within ten minutes.	Wait ten minutes and try again, carefully.
"You were signed out after an hour of inactivity."	Normal security. The panel logs you out when idle.	Sign in again. Saved work is safe.
"Session expired — please try again."	A form sat open too long before being submitted.	Sign in again and re-enter the form.
"A product needs at least a name and a sector."	One of the two required fields is empty.	Fill in the product name and choose a sector.
"Photo not saved..."	Over 5 MB, or not a real image file.	Reduce the photo, or re-save it as a JPG or PNG.
"Clear the filter to reorder products."	Rows are hidden by the filter box, so dragging is ambiguous.	Empty the filter box, then drag.
"Could not save the order..."	The connection dropped, or someone else edited the catalog at the same moment.	Reload the page and set the order again.
"Your current password is incorrect."	The confirmation password in the Account box is wrong.	Nothing was changed. Retype it and save again.
A change is not showing on the public site.	Your browser is showing you a stored copy of the page.	Reload the public page. On a computer, hold Shift while pressing reload.

WHAT YOU SEE	WHY	WHAT TO DO
The site says it is temporarily unavailable.	The website cannot reach its database. This is a server problem, not something you did.	Contact your developer or hosting provider — nothing in the admin panel can fix it.

11 Quick reference

Limits worth remembering

THING	LIMIT
Product name	160 characters
Category / Brand	80 characters each
Description	600 characters
Tags	200 characters — first two shown
Specification label / value	60 / 100 characters
Photo file size	5 MB
Photo formats	JPG, PNG, WebP, GIF
Password	8 characters minimum
Settings fields	400 characters each
Automatic sign-out	60 minutes idle
Failed sign-in lockout	6 tries per 10 minutes

Safe to do any time

- Add a product, edit one, or change the catalog order
- Read inquiries and change their status
- Export the inquiries spreadsheet
- Update company details and social links
- Click any **SOON** menu item

Stop and think first

- **Deleting a product** — the photo and specifications go with it
- **Deleting an inquiry** — you lose the client's details and their message
- **Delete Closed Inquiries** — export the CSV first
- **Restore Default Catalog** — erases the entire catalog you have built

THE ONE HABIT THAT MATTERS

After any change, click **View Website** ↗ and look at the public page. It takes five seconds, and it is the only way to be certain your customers see what you intended.

EthioTractors — Managing Your Website. Screenshots in this guide were taken from the live admin panel; the client names, messages and visitor figures shown are sample data used for illustration.

This document describes how to sign in to your admin panel. Keep it among your staff — please do not publish it or link to it from the public website.
